| Mihintale, Sri Lanka

PROFESSIONAL SUMMARY

BICT (Hons) undergraduate at the University of Vavuniya with practical exposure to cloud and DevOps tooling — AWS (EC2, S3, IAM), Docker, Kubernetes, Jenkins, Ansible, Terraform, and CI/CD pipelines. Skilled in full-stack web development across the MERN stack (MongoDB, Express.js, React.js, Node.js), PHP, and C#/.NET, with experience building secure, role-based web applications integrated with third-party APIs and payment gateways. Proven leadership through sports captaincy and international volunteer programmes; seeking an internship to apply and grow technical skills in a real-world engineering environment.

EDUCATION

BICT (Hons) in Information and Communication Technology

2023 - Present

Faculty of Technological Studies, University of Vavuniya, Sri Lanka

- Academic Standing: 3rd Year, 2nd Semester | GPA: 3.43 / 4.00

TECHNICAL SKILLS

Key Competencies: DevOps & CI/CD, Cloud Computing (AWS), Full-Stack Development, REST API Design, Authentication & Security (JWT), Database Design, Agile Teamwork

Programming Languages: C, C++, Java, Python, JavaScript, C#

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js

Databases: MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Kubernetes, Jenkins, Ansible, Terraform, CI/CD

Version Control: Git, GitHub

Operating Systems & Scripting: Linux (Ubuntu), Bash Shell Scripting

Tools: Figma, VS Code, Postman

PROJECTS

Tourvisito — AI-Powered Travel Marketplace (MERN Stack)

2026

- Developed a full-stack travel marketplace with role-based dashboards, secure bookings, and automated trip management
- Integrated Google Gemini AI, Stripe payments, JWT authentication, and modular REST APIs for a scalable, secure planning system

GitHub: github.com/Mushrif-Unique/Tourvisito

Academic Timetable Management System (ATMS)

2026

- Built a web-based system (group project) to automate timetable scheduling and reduce scheduling conflicts for educational institutions
- Implemented role-based access, timetable management, and conflict detection using PHP, MySQL, HTML, CSS, and JavaScript

GitHub: github.com/Mushrif-Unique/atms

Home Rental Management System

2025

- Built a desktop application in C# (.NET Framework, Visual Studio) with role-based access for tenants, landlords, and admins
- Implemented property listing, rental tracking, and management features across three user roles

GitHub: github.com/Mushrif-Unique/HomeRentalManagementSystem

CERTIFICATIONS

- Terraform Fundamentals: Architecture & Core Utilities - By Packt and offered through Coursera (July 2026)
- Introduction to DevOps – Great Learning (July 2026)
- Introduction to Object-Oriented Programming in C++ — Goldsmiths, University of London (May 2024)
- Business Analysis & Process Management — Coursera Project Network (May 2024)

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

- IGVP of Partnership Development — AIESEC Sri Lanka, University of Vavuniya
- Captain — Football Team, Faculty of Technological Studies
- Event Coordinator — Youngstar Sports Club
